

Quick setup guide

Connecting your devices to nbn™ - HFC Foxtel

TP-Link Model TD-VG5612

Easy installation guide for your devices

Your Sorted Services Wi-Fi Modem Router is pre-configured. Just follow the simple steps below to get your services connected. There is no need to read the quick installation guide or run the installation CD which comes in the packing box.

1. **Ensure your service is active:** Sorted Services will advise you when your service is active. If you are switching from an ADSL/HFC/ nbn™ service, you'll know it's time to set up your modem when your internet stops working.
2. **Connect to the nbn™ network:** Network cable provided connects to LAN4/WAN port of the modem. This port is clearly marked on your modem in yellow and is the first LAN port from your left. The other end of the cable needs to connect the Ethernet port on the nbn™ Connection Box.
3. **Connect your home phone:** If availed of Sorted Services Phone Bundle, telephone cable provided connects your telephone handset to PHONE 1 port.
4. **Connect your computer:** Network cable provided connects your computer to any of LAN1, LAN2 and LAN3.
5. **Power up modem:** Plug the provided power adapter supply cable into the POWER port and other end to a standard electrical wall socket. Power on the modem by pressing the power button. The INTERNET LED light on the modem's front panel will be solid green when your internet connection is ready.
6. **Connect via Wi-Fi:** Find the Wi-Fi network name (SSID) and wireless password (PIN) printed on the bottom of the modem. Using your wireless device, scan the wireless networks and select the relevant SSID then enter the wireless password exactly as printed on the label.
7. **Connecting your Foxtel using Splitter:** If you're also subscribing to a pay TV service such as Foxtel over your HFC connection, you'll need a splitter to ensure it keeps working, nbn™ will provide this as well.

Installation without pay TV service:

Installation with existing pay TV or cable internet service:

Please note that your nbn™ service can take up to 48 hours to get connected after successful activation.

If you are having problems getting connected be sure to contact us via [Sortedservices.com](https://sortedservices.com) or through our app to access self-help tools, schedule a call-back or receive an email response so we can help you through the connection process.

That's it! Welcome to Sorted Services' nbn™ Service.
